

WINMAGIC[®]
DATA SECURITY

SECUREDOC™ ENTERPRISE SERVER v6

REDUCING TCO AND MAXIMIZING IT MANAGEMENT

– BYOD READY

WinMagic's SecureDoc Enterprise Server (SES) 6.1 offers organizations total control over their data security environment ensuring maximum security and transparency in regular work flow. With industry-leading full disk encryption (FDE) technology and industry-first technology like PBConnex™, SES enables customers to streamline their IT processes and as a result, help reduce the total IT cost of ownership.

SES places all security-related management under one centralized enterprise server, including policies, password rules, and the manageability of encryption across PC, Mac and Linux platforms alike.

It also easily integrates with industry-standard technologies such as OPAL-compliant Self-Encrypting Drives (SEDs) and Intel® Anti Theft Technology, SES truly allows businesses to deal with the heterogeneous nature of their IT environment.

FEATURES AT A GLANCE

- Manage full disk encryption for laptops and desktops
- Mobile Device Management (MDM) for Desktops, Laptops, iOS and Android devices
- Support for Mac OS X and FileVault 2
- Centralized management through standard server-based or web console
- Only full-disk encryption solution to offer wired and wireless pre-boot network authentication
- Certifications: FIPS 140-2, Common Criteria EAL4, BITS, AES validation
- Supports Windows 8

SecureDoc Enterprise Server (SES) offers unified view of all devices types from a single management console because most people today carry many devices with a variety of operating systems.

BYOD READY AND SECURE

In today's world BYOD has become a reality. The question which then becomes how do I ensure that it is secure and manageable. With WinMagic the answer is simple. SecureDoc uses a FIPS 140-2 certified AES 256-bit cryptographic engine to encrypt data and is compatible with all editions of Microsoft Windows 8, Windows 7, Vista and XP as well as Mac OS X Mountain Lion, Lion and Linux platforms. WinMagic's SecureDoc™ Full-Disk Encryption Solution protects sensitive data at rest on desktops and laptops while enforcing and managing protection policies on tablets and smartphones.

PBCONNEX

SecureDoc with PBConnex is the only data encryption and management solution that allows for pre-boot network authentication either wired or wirelessly. PBConnex utilizes network based resources to authenticate users, enforce access controls, and manage end point devices before the operating system loads. This unique and ground-breaking approach to Full Disk Encryption (FDE) management also results in significant cost savings for organizations by streamlining the time and cost associated with things such as password resets and device staging. In addition multiple users can safely use the same device without ever putting confidential data at risk.

SES WEB CONSOLE

The SES web console provides a web-based interface for SecureDoc Enterprise Server, WinMagic's solution for managing encrypted devices in an enterprise environment. The SES web console supports many of the daily administration features provided by the SecureDoc Enterprise Server, including user management, administrator management, device management and recovery, password management, and report management. It also includes a Mobile Device Management (MDM) server component.

MOBILE DEVICE MANAGEMENT (MDM)

SecureDoc's MDM feature is a key component of the SES Web console, offering enterprise customers a holistic view to their status of their mobile devices, allowing them to manage the deployment of Android® and iOS® devices and also to ensure that the appropriate security and password policies are enforced. SecureDoc MDM offers the 'proof' that IT administrators require to ensure compliance with key industry regulations while at the same time offering a strong solution for bring your own device (BYOD) environments.

FILEVAULT 2

SecureDoc offers one of the strongest Mac OS X FDE solutions available on the market today. For customers that prefer to leverage the native encryption and security offered by Mac OS X's FileVault 2 solution, SecureDoc can now manage that as well. FileVault 2 enterprise management gives businesses the flexibility to choose how they want to encrypt and manage their Apple devices yes still have the ability to have all their devices managed by SES's central management console.

WinMagic offers the most comprehensive full disk encryption on the market today allowing you to choose the types of devices you want with the advantage of knowing you are well protected.
